Store Front Window Gates

Our standard gates provide a cost – effective visual and physical deterrent allowing business owners to be stress-free after business hours. In the open position, these gates slide out of the way becoming virtually invisible during working hours. Single and pair gates are available. Optional top H bracket for pair gate provides superior security while in-use.

Xtra-Duty Folding Gates for Store Fronts & Vestibules

Our Xtra-Duty gates offer twice the durability and security of our standard heavy-duty gates, maintain the same height while retracted or in-use and are designed to include a top and bottom track for additional security and ease-of-use. Single and pair gates are available.

Made to exact specifications, IEP custom-fabricates all gates to secure and protect openings of any size.

HOW TO ORDER IEP RETAIL GATES:

- Determine where the gate will be mounted – face mount or in-jamb.
- Measure the exact width and maximum height of the opening(s) needing security.
- Determine track configuration – standard heavy-duty gates require only a bottom track.
- Xtra-Duty gates require a top and bottom track.
- Call an IEP Customer Service Representative for options and pricing.
